

# Lipfty 8 - Standard Rules

Shared-piece strategy on a standard 8x8 draughts/checkers board

Pinned Opening Four - diagonal matching colours

**Playing area.** The inner 6x6 is the active board. The outer ring is the shared reserve.

**32 pieces.** Four automatic Opening Four anchors, 24 normal reserve pieces (12 of each colour), and four Final Four pieces.

**Opening Four.** Before either player starts, four pieces are automatically placed on the four corners of the inner 6x6. Matching colours are diagonally opposite.

**Pinned.** These four anchors never Move or Jump and cannot be jumped over. They still count normally towards every win.

**Objective.** Make four matching-colour pieces horizontally, vertically or diagonally; a tight 2x2 square; or a larger board-aligned spaced square. A win ends the game immediately.

## Starting player

After the four anchors are in place, the starting player is selected by the agreed method or app setting. The opponent chooses the first normal reserve piece/colour for that starting player.

## Normal turn

The opponent hands the player an actual normal reserve piece. While both normal reserve colours remain, the player must use that handed colour and may choose one of three actions: **Place** the handed piece, **Move** a matching movable board piece, or make one legal **Jump** with a matching movable board piece.

## Place

Place the handed reserve piece on any empty square in the inner 6x6. After a normal placement, the player who just placed chooses the normal reserve piece/colour for the opponent's next turn.

## Move

Move one movable board piece of the handed colour exactly one square to any empty adjacent square - horizontal, vertical or diagonal. The handed reserve piece is not consumed. The four pinned opening anchors can never Move or Jump. A player also may not Move or Jump the exact board piece the opponent moved on the immediately preceding turn.

## Jump

Make one non-capturing leap with a movable board piece of the handed colour over one adjacent **opposite-colour** movable piece into the empty square immediately beyond. Jumps may be horizontal, vertical or diagonal. There are no multi-jumps. The pinned opening anchors cannot be jumped over. If the Jump itself makes a win, the game ends immediately.

# Lipfty 8 - Turn Consequences and Endgame

## After a non-winning Move

1. The opponent of the mover chooses a normal reserve piece and immediately places it.
2. If that placement does not win, the same opponent chooses a second remaining normal reserve piece for the original mover, who immediately places it.
3. If neither compulsory placement wins, the responder/opponent takes the next normal turn. The piece moved on the original Move is protected from being Moved or Jumped on that immediately following turn.

## After a non-winning Jump

1. Lift the exact piece that was jumped.
2. The opponent immediately redeploys that exact piece on any empty square. A win made by this redeployment ends the game.
3. Otherwise, the opponent receives the next normal turn. The original jumper chooses the normal reserve piece/colour handed to that opponent. A Jump consumes no normal reserve piece.

## One-colour finish

As soon as either normal reserve colour is exhausted, Move and Jump stop completely. Every remaining normal reserve piece must then be placed, one per normal turn, until the normal reserve is empty. If a two-placement Move consequence has already started, complete that consequence first.

## Final Four

When the normal reserve is empty, the four Final Four corner pieces become playable. Final Four is placement-only. On each turn the player chooses one of the remaining Final Four pieces and places it on any empty square. If all four are placed without a win, the game is a draw.

## Winning patterns

| Pattern               | Requirement                                                                 |
|-----------------------|-----------------------------------------------------------------------------|
| Horizontal / vertical | Four matching-colour pieces in a straight row or column                     |
| Diagonal              | Four matching-colour pieces in a straight diagonal                          |
| Tight square          | Four matching-colour pieces forming a 2x2 square                            |
| Spaced square         | Four matching-colour pieces at the corners of a larger board-aligned square |

**Immediate-win rule.** A win ends the game immediately whether it is made by a normal placement, Move, Jump, Jump redeployment, compulsory placement or Final Four placement.

**Standard configuration.** Move, Jump, Diagonal, Tight Square and Spaced Square are on. Diamonds are off. Optional app switches may be used for experiments or simpler variants.

**Shared colours.** Colours belong to the pieces, not to either player. The app may display the two internal colours using any two user-selected colours.
