

LIPFTY 7

Standard Rules · 8×8 board · inner 6×6 playing area · full 32-piece draughts/checkers set

Piece group	Pieces	Use
Opening Four	4 top-corner pieces	First four turns; placement only
Normal reserve	24 (12 each colour)	Main play; shared by both players
Final Four	4 underneath corner pieces	End phase; placement only

1. Objective

Make four matching-colour pieces in any enabled winning formation. In Lipfty 7 Standard the wins are: **four horizontal**, **four vertical**, **four diagonal**, the four corners of a **tight 2×2 square**, or the four corners of a larger **board-aligned spaced square**. Diamonds are not wins. A win ends the game immediately.

2. Shared pieces

The two colours are shared resources, not player colours. During normal play the opponent chooses the reserve piece/colour you must use. The same player may therefore use different colours on different turns.

3. Opening Four

For the first four turns, players alternate normally. On your turn choose one of the four available top-corner pieces and place it on any empty square in the inner 6×6 area. The Opening Four are placement-only: the opponent does not choose your colour and no Move or Jump is allowed.

4. Normal handover and turn choices

After the Opening Four, the player who has just completed a normal turn chooses an actual **normal reserve** piece and hands it to the opponent. Its colour is the colour the receiver must use. While both normal reserve colours remain, the receiver may choose exactly one of: **Place**, **Move**, or **Jump**.

5. Place

Place the handed normal reserve piece on any empty square in the inner 6×6 area. The piece is consumed from the reserve. If the placement wins, the game ends immediately.

6. Move

Instead of placing the handed piece, Move one board piece of that same colour **one square** to any empty adjacent square. Horizontal, vertical and diagonal movement are all allowed (up to eight directions). The handed reserve piece is not consumed; it returns to the reserve.

7. Consequence of a non-winning Move

1. The opponent/responder chooses one normal reserve piece and immediately places it.
2. If that placement does not win, the same responder chooses another remaining normal reserve piece for the original mover.
3. The original mover places that second piece.
4. If neither compulsory placement wins, the consequence ends and the responder takes the next normal turn.

The exact board piece moved is protected: the responder may not Move or Jump that piece on their next normal turn.

LIPFTY 7 · STANDARD RULES

Jump, one-colour finish and Final Four

8. Jump

Instead of placing the handed piece, make **one** Jump with a board piece of that same colour. Jump over one adjacent **opposite-colour** piece into the empty square immediately beyond it. Jumps may be horizontal, vertical or diagonal. There are **no multi-jumps**. The handed reserve piece is not consumed.

9. Jump consequence — redeploy-pass

1. Move the jumping piece to its landing square. If that Jump itself creates a win, the game ends immediately and the jumped piece is not lifted.
2. Otherwise lift the exact piece that was jumped over.
3. The opponent immediately redeploys that exact lifted piece on any empty square.
4. If the redeployment creates a win, the opponent wins immediately.
5. Otherwise the opponent takes the next normal turn. The original jumper chooses the normal reserve piece/colour handed to that opponent.

A Jump consumes no normal reserve piece and does not trigger the two compulsory reserve placements used after a Move.

10. One-colour finish

As soon as either normal reserve colour is exhausted, **Move and Jump stop completely**. From then on every remaining normal reserve piece must be placed, one per normal turn, until the normal reserve is empty. Players continue alternating normally. If a two-placement Move consequence has already begun when a colour becomes exhausted, finish that consequence first; thereafter normal turns are placement-only.

11. Final Four

When the normal reserve is empty, the four underneath corner pieces become playable. Final Four is placement-only. On each turn the current player chooses one of the remaining Final Four pieces/colours and places it on any empty square. No Move or Jump is allowed. A winning placement ends the game immediately. If all four Final Four pieces are placed without a win, the game is a draw.

12. Immediate wins

A win always takes priority and ends the game immediately, whether it is made by a normal placement, Move, Jump, Jump redeployment, compulsory placement after a Move, or Final Four placement.

13. Commitment and protected piece

Once a reserve, corner or board piece is selected, that choice is committed for the turn. You may not Move or Jump the exact board piece your opponent moved on their immediately preceding normal turn. A newly placed or redeployed piece is not protected merely because it was placed.

14. Standard configuration

Rule	Lipfty 7 Standard
Move	ON
Jump	ON · single · opposite-colour only
Jump consequence	Lift jumped piece · opponent redeploys · responder gets next normal turn
Diagonal wins	ON
Tight Square	ON
Spaced Square	ON
Diamond / Spaced Diamond	OFF
One normal colour remaining	Placement only
Final Four	Player chooses own remaining piece · placement only

Board note: all playable placements are made on the inner 6×6 area. The outer ring is used to display and manage the shared reserve and corner pieces.
